Proportional valve module 750-632 supply voltage at DC 24... 24V, voltage type of the supply voltage DC, number of functions 0, number of HW interfaces Industrial Ethernet 0, number of interfaces PROFINET 0, number of HW interfaces serial RS-232 0, number of HW interfaces serial RS-422 0, number of HW interfaces serial RS-485 0, number of HW interfaces serial TTY 0, number of HW interfaces parallel 0, number of HW interfaces wireless 0, number of HW Interfaces USB 0, number of HW interfaces other 0, supports protocol for other bus systems, system component, suitable for pressure control, suitable for flow control, suitable for multi-axis positioning, suitable for single-axis positioning, protection class (IP) IP20, Fieldbus connection possible via separate bus coupler, DIN rail mounting possible, explosion protection category for gas ATEX gas explosion protection, Cat. 3G, explosion protection category for dust ATEX dust explosion protection, Ka t. 3D, width 12mm, height 64mm, depth 100mm, The proportional valve module is used to control 2 single-coil valves with up to 24 V/1.6 A or one valve with up to 24 V/2 A. The module has 2 current-controlled Pulse width modulation outputs with switchable dithering. The valves can be controlled unipolarly or bipolarly. An additional operating mode is the operation of a valve with 2 unipolar coils. In this operating mode, the module is single-channel! Characteristic adjustments such as e.g. B. Zero offset, knee compensation or range limitations can be set via parameters. The setpoint specification can be adapted to the application via scaling and parameterizable increase and decrease ramps. Two additional digital inputs are available, for example for monitoring limit value switches, etc.
