CombiController V20 four-pole with FS V20-4+FS-280 number of poles 4, maximum continuous voltage AC 280V, remote signaling, The V20 surge arrester made of halogen-free plastic is suitable for surge protection equipotential bonding according to VDE 0100-443 (IEC 60364-4-44). The modular, pluggable arresters are characterized by a dynamic disconnect device and an optical status display. The FS variant is also equipped with a potential-free changeover contact that enables remote signaling. The SurgeController is particularly suitable for potential equalization in main and sub-distributions, depending on the type in the area of TN networks. Thanks to the high-performance varistors, the discharge capacity is up to 40 kA (8/20) per pole. The vibration-proof latching and the voltage and type coding ensure safety and avoid mixing up upper and lower parts. The wedge-shaped design of the contacts makes it easy to insert and even easier to remove the upper parts. Additional technical product information can be called up quickly and easily using mobile devices using the QR code on the rating plate.
