SIMATIC Timer Timer 4DI 6DQ 6ES7138-6CG00-0BA0 supply voltage at AC 50 Hz 0V, supply voltage at AC 60 Hz 0V, supply voltage at DC 19.2 ... 28.8V, voltage type of the supply voltage DC, number of HW interfaces Industrial Ethernet 0, number of Interfaces PROFINET 0, number of HW interfaces serial RS-232 0, number of HW interfaces serial RS-422 0, number of HW interfaces serial RS-485 0, number of HW interfaces serial TTY 0, number of HW Parallel interfaces 0 Number of wireless HW interfaces 0 Number of USB HW interfaces 0 Number of other HW interfaces 0 System component Suitable for counting Degree of protection (IP) IP20 DIN rail mounting possible Explosion protection category for dust None Width 15mm, height 73mm, depth 58mm, SIMATIC ET 200SP, TM Timer DIDQ 10x 24V time-controlled digital inputs and outputs 4DI, 6DQ count with time stamp, PWM, oversampling The SIMATIC ET 200SP is a modular, scalable and highly flexible, decentralized peripheral system. Due to its small footprint, it is particularly designed for installation in small switch boxes close to the machine. The modules can either be plugged directly into an ET 200SP CPU or connected to a central controller via PROFINET or PROFIBUS. The SIMATIC ET 200SP can be expanded with up to 64 I/O modules that can be plugged in in any combination. The system offers a very extensive range of assemblies. Many modules are also available in different versions, which significantly improves scalability in terms of functionality and price. In addition to modules with standard functionality (ST), modules with an extended range of functions and diagnostics (HF High Feature / HS High Speed) are also available. Modules with basic functionality (BA) are available for price-sensitive applications. The advantage of the ET 200SP system lies in its ease of use, e.g. B. through the free choice of the PROFINET connection technology via the bus adapter, the tool-free wiring with push-in technology, improved accessibility of the wiring through the new arrangement of the spring openers next to the associated conductor opening and the channel-specific diagnostic functions. The possibility of changing modules and terminal boxes during operation, the so-called hot-swapping, ensures machine availability and productivity. Technology modules offer hardware-related signal pre-processing for fast counting, precise measurement, position detection and pulse width modulation for different encoders and actuators. The accessories available for the ET 200SP range from color and reference identification labels to labeling strips for the individual modules and ensure maximum clarity in the control...

YOUR ADVANTAGES

WORLDWIDE TRADE
 Corporate video eibmarkt®

99% CUSTOMER SATISFACTION
 > 500,000 customers worldwide

DHL TRACK & TRACE
 Shipment tracking

COMPLAINTS HANDLING
 Obliging and 100% safely

25 YEARS OF EXPERIENCE
 In worldwide mail order

* Note on delivery time: Day = Monday to Friday, no public holiday in Bavaria or Saxony. Goods are also delivered on Saturdays (DHL).

** Payment methods may vary from country to country. All prices plus shipping and excluding customs duties or other additional costs (import sales tax) for deliveries outside the EU.

*** Savings compared to RRP = the manufacturer's recommended retail price. RRP is the price recommended to retailers by the manufacturer, importer or wholesaler as a resale price to the customer. The RRP is also referred to as the list price and is defined as the highest possible price that a buyer would pay for a specific product before any discounts (Source of gross list prices: Germany).
