Binary input universal KNX, 6-fold, 230V TXA306 bus system KNX, other bus systems without, mounting type REG, width in modular units 6, with bus coupling, with LED display, number of inputs 6, input voltage 230 ... 230V, type of input voltage AC/DC, Degree of protection (IP) IP20, binary input 6-fold, universal, REG, KNX. Binary input universal modular for connection to signal transmitters (e.g. conventional switches, buttons, alarm transmitters, etc.). Each input can either be used with 24 V AC/DC - 230 V AC or as a potential-free input. The device has a manual control (which can also be locked), which enables the bus function to be tested independently of the inputs. The function of the LED display can be configured. The mains failure monitoring makes it possible to differentiate between an open input and a power failure by specifying a reference input. The input signals are converted into the corresponding bus telegrams independently of one another. Functions: Lighting, blinds, shutters and/or heating control, counting functions and scene recall are freely definable for each input. The device is equipped with the installation-friendly QuickConnect connection technology.

* Note on delivery time: Day = Monday to Friday, no public holiday in Bavaria or Saxony. Goods are also delivered on Saturdays (DHL).

** Payment methods may vary from country to country. All prices plus shipping and excluding customs duties or other additional costs (import sales tax) for deliveries outside the EU.

*** Savings compared to RRP = the manufacturer's recommended retail price. RRP is the price recommended to retailers by the manufacturer, importer or wholesaler as a resale price to the customer. The RRP is also referred to as the list price and is defined as the highest possible price that a buyer would pay for a specific product before any discounts (Source of gross list prices: Germany).
