Switch insert 540500 compilation of basic element, version other, load type other, can be used with button, installation type flush-mounted, material other, material quality other, surface other, design of the surface not applicable, color other, fastening type claw/screw fastening, system 3000 electronic switch insert features: connection of Extensions possible. Control of thermal actuators in combination with a room temperature controller attachment. Lamp-saving switching on. Electronic short circuit protection. Electronic over-temperature protection. Operation with and without neutral conductor connection. Operation with neutral conductor: Switching of incandescent lamps, HV halogen lamps, electronic or inductive transformers with halogen or LED lamps, switchable or dimmable HV LED or compact fluorescent lamps. The device is supplied via the phase conductor and neutral conductor, so there is no leading edge or trailing edge. Operation without a neutral conductor: Switching of incandescent lamps, HV halogen lamps, electronic or inductive transformers with halogen or LED lamps, dimmable HV LED or compact fluorescent lamps. The device is supplied via the outer conductor and the connected load and therefore works according to the leading or trailing edge principle. Automatic or manual setting of the dimming principle suitable for the load (leading edge or trailing edge). Display of the set operating mode via LED. Notes: When operating without a neutral conductor, the minimum load for incandescent lamps, HV halogen, Gira Tronic transformers and wound transformers increases to 50 W. If the ambient temperature is higher than 25 C, the connected load must be reduced.
