KNX switch/blind output 10-fold, 10A TYA610B bus system KNX, other bus systems without, mounting type REG, width in modular units 6, on-site/manual operation, with LED display, number of binary inputs 0, max. switching capacity 9000W, output power 1200W, max. number of switching outputs 10, max. switching current 10A, rated current 10A, rated operating voltage 230 ... 230V, different phases can be connected, with bus coupling, degree of protection (IP) IP20, switching/blind actuator 10/5-gang, 10A, KNX. Switching output for switching 10 socket/lighting outputs or 5 blind outputs. To control lighting outputs, you can choose between ON/OFF, timer, safety off, forced control, blocking logic, preset delay function or 64 scene functions per channel. With switching function for time or permanent function. The movement command UP/DOWN/Stop and the slat angle can be adjusted via the blind function. Percent control of the blind to move to a predefined position. The sun protection function can be used in conjunction with an outdoor sensor to control the brightness of each room. With alarm function to control the blinds in a defined position. Safety descent as long as the button is pressed. 64 scene functions per channel. Logic block for controlling the output depending on the result of a logical operation. Preset locking function, forced control. The device converts the bus information into corresponding commands. The outputs are switched via the system line from the inputs assigned to them. All outputs have manual operation on the device, which can also be locked, as well as a switching status display using an LED and an operating hours counter for each output. The device can be read with a diagnostic tool. Labeling option directly on the device.
