Bus telegram duplicator RS485 FTD14 bus system radio bus, other bus systems other, mounting type REG, width in modular units 1, number of inputs 60, number of outputs 60, protection class (IP) IP20, with bus coupling, telegram duplicator for the Eltako RS485 Bus with interchangeable antenna. Standby loss only 0.5 watts. Connection to the Eltako RS485 bus. Bus cross-wiring and power supply with jumper. Operation in connection with FAM14 or FTS14KS. The telegrams of learned IDs are duplicated and sent directly to the Eltako wireless network with a new output ID. These radio telegrams can be specifically taught into decentralized actuators. A total of 120 memory locations are available. The upper rotary switch is used to send a radio telegram in accordance with the operating instructions. In normal operation it is set to RUN. The lower rotary switch is used to learn and delete IDs according to the operating instructions. In normal operation it is set to RUN. The red LED under the upper rotary switch accompanies the learning process. The green LED under the lower rotary switch lights up briefly when a radio telegram is sent.
