Analog I/O 4-fold, 2SU MDRC, 0-10V, In-/Output shiftable. Suitable as analog output to control ventilation systems and other systems with 0-10V input. Also useful as an analog input to engage rotation speed or other 0-10V values. Each channel can be configured independently (In-/output). In/outputs are galvanically isolated from the bus. In/outputs are galvanically connected together. Voltage for output operation is generated inside the actuator. No external power supply required. Input operation 0-10V/2-10V or 0-20mA/4-20mA (switchable). - Adjustable conversation of measuring unit and DPT. - Min/max function, wire breakage detection. - Threshold and traffic light function. Output functions 0-10V: - Control by 1Byte, 2Byte or 1Bit objects. - Day/night function to limit control value. - Emergency mode if given value fails. Quick application download (long frame support for ETS5).

* Note on delivery time: Day = Monday to Friday, no public holiday in Bavaria or Saxony. Goods are also delivered on Saturdays (DHL).

** Payment methods may vary from country to country. All prices plus shipping and excluding customs duties or other additional costs (import sales tax) for deliveries outside the EU.

*** Savings compared to RRP = the manufacturer's recommended retail price. RRP is the price recommended to retailers by the manufacturer, importer or wholesaler as a resale price to the customer. The RRP is also referred to as the list price and is defined as the highest possible price that a buyer would pay for a specific product before any discounts (Source of gross list prices: Germany).
