Push-button sensor with labeling field 75161644 bus system KNX, other bus systems without, type of installation flush-mounted, with theft/dismantling protection, number of actuation points 2, number of buttons 2, with LED display, with labeling field, material other, material quality other, surface painted, design of Matt surface, color bronze, RAL number (similar) 3012, degree of protection (IP) IP20, push button sensor 1gang comfort with labeling field Arsys light bronze, painted. 1-way comfort push-button with dismantling protection and labeling field, with one operating and two status LEDs. Concealed installation, surface/design range. The push-button comfort 1-fold is an instabus user module for plugging onto the bus coupler Up. The push button sensor is mechanically locked to the bus coupler by the integrated dismantling protection. The 1-gang comfort push-button has four status LEDs and one operating LED, as well as a labeling field. The data exchange between the push button sensor and the bus coupler takes place via the user interface (AST). Every button press on the 1-gang push button sensor causes the bus coupler to generate a telegram and send it to the bus. In addition, the execution of service routines is possible. The telegram format depends on the parameterization of the application. Depending on the selected parameterization, switching, dimming, blind and value transmitter functions can be combined as desired. Application properties: Buttons, switching, switching in toggle mode, dimming, blind control, switching and dimming and blind control, dimming and blind control, 2 operating levels, value transmitter with value change function, locking of manual operation, cyclical transmission, switching, dimming and blind control, light scene recall, edge, value transmitter, flexible assignment, forced operation. LED: Version with status LED per button, version with operation LED, version with status and operation LED. Protection against dismantling: with mechanical protection against dismantling, with software-controlled protection against dismantling.
