Surge protection device type 1+2 VG-BC DCPH-MS600 DC network type, other network type, number of poles 2, nominal voltage DC 600V, max. PV voltage 600V, max. mounting type pre-assembled in the housing, size other, signaling on the device optically, test class type 1 and 2, system solution for lightning current and surge protection of PV inverters with 2 separate inputs (MPP tracker) pre-assembled in the housing ready for connection. The arresters with error-resistant Y-circuit with 3 varistors for use in accordance with VDE 0100-712, pluggable with dynamic disconnection device and optical function display are characterized by a low DC protection level < 2.6 kV. The housing including cable gland set, with protection class IP65, made of polycarbonate is UV-resistant and suitable for outdoor use. 10 terminal points up to 6 mm² are already pre-installed per protective device. The simple, quick and safe connection of the DC cables via the feed-through terminal blocks enables optimal protection from the electrical inverter. The protective devices must be selected according to the maximum total open-circuit voltage (Uoc) of the PV string. If there is a risk of condensation forming due to wind, ice, temperature or sun, additional measures may be necessary!

* Note on delivery time: Day = Monday to Friday, no public holiday in Bavaria or Saxony. Goods are also delivered on Saturdays (DHL).

** Payment methods may vary from country to country. All prices plus shipping and excluding customs duties or other additional costs (import sales tax) for deliveries outside the EU.

*** Savings compared to RRP = the manufacturer's recommended retail price. RRP is the price recommended to retailers by the manufacturer, importer or wholesaler as a resale price to the customer. The RRP is also referred to as the list price and is defined as the highest possible price that a buyer would pay for a specific product before any discounts (Source of gross list prices: Germany).
