Centrifugal duct fan RR 315 Housing material: treated steel, unloaded air volume 1310m³/h, supply voltage 230V, power consumption 0.224kW, with thermal protection, electrical connection terminals, protection class (IP) IP44, max. air temperature 70°C, suitable for electronic control, Suitable for transformer control, length 257mm, housing diameter 402mm, duct diameter 315mm, flange connection, radial duct fan for direct installation in the duct system. For conveying medium and small air volumes against high resistance. Casing made of galvanized sheet steel with round connection pieces matched to standard pipes. Centrifugal impeller with backward curved blades made of galvanized sheet steel. Pressed directly onto the motor and dynamically balanced as a unit. Low noise, high efficiency. Single-phase AC external rotor motor, closed design, maintenance-free, built-in thermal contacts, sealed, low-noise ball bearings with long-term lubrication. Output control: using an electronic controller or step transformer.

* Note on delivery time: Day = Monday to Friday, no public holiday in Bavaria or Saxony. Goods are also delivered on Saturdays (DHL).

** Payment methods may vary from country to country. All prices plus shipping and excluding customs duties or other additional costs (import sales tax) for deliveries outside the EU.

*** Savings compared to RRP = the manufacturer's recommended retail price. RRP is the price recommended to retailers by the manufacturer, importer or wholesaler as a resale price to the customer. The RRP is also referred to as the list price and is defined as the highest possible price that a buyer would pay for a specific product before any discounts (Source of gross list prices: Germany).
